

30 July 12

Recently I had the opportunity to purchase a two (2) acre wooded lot which joined my residential lot. The lot I purchased had a drainage ditch which separated it from my residential lot. Once purchase was completed I contacted Steve to provide me with an estimate on clearing a portion of the purchased lot as well as turning the drainage ditch into a small pond for wildlife habitat. Steve met with me as requested surveyed the work to be completed and provided me with an estimate. The estimate was more than fair and I agreed to have the work completed.

I found Steve to be a true professional. His work exceeded expectations and I found him to be a genuine honest and hard worker who took pride in his work. I would highly recommend his work to anyone who would require his services.
